135 sci-engineering: incl boris belitskiy replies to questions from irish listener about soviet space program answering question about future space flights belitskiy refers to work currently being carried out by cosmonauts on salyut seven and says this work for sci and econ needs is main thrust fo soviet space program and will be continued by other crews. in reply to budget for soviet space launchings, belitskiy says question difficult to give answer in light of tech knowledge gained from space experiments; the final question is whether it will ever be possible for ussr and usa to collaborate on joint

space program, pointing out ussr would like to see much greater space coop btwn two countries than at present, but the U.S. admin is concentrating more and more on milit space projects and so long as such milit ambitions dominate u.s. space policy there is little hope of two countries collaborating

on large-scale space ventures. (enginter 1210)
